

 **FIREGATOR**TM
AUTOMATIC FIRE SUPPRESSION SYSTEM

The clear choice in Automatic Fire Suppression to protect yourself and your assets.

Low Cost

FireGatorTM offers affordability and low maintenance to protect your livelihood, your investment, and yourself in the case of a fire. The entire system is compact and installation friendly for all types of Semi Trucks. It is designed to last for over 10 years protecting your truck for many years to come. Installation and inspections are simple and can be done yourself to insure that your system will deploy in the event of a fire.

Reduce Your Insurance Premiums

Insurance companies base your premiums on risk. Since FireGatorTM protects your truck from fire, which is a very common reason for loss, most insurance carriers discount your premiums based on the decreased risk. Depending on your insurance carrier, over the lifetime of your FireGatorTM system, you could end up saving more in lowered premiums than the system costs you up front. Between reduced premiums and peace of mind to sleep easy in your truck, putting a FireGatorTM system on your Semi just makes sense.

Tested & Approved

FireGator™ is powered by generators that protect some of the most valuable assets in the world, like the Space Shuttle Transport vehicles. The generators are rugged enough to protect US military vehicles in Afghanistan and Iraq, and they are versatile enough to protect remotely located Wind Turbines. More than 100,000 devices powered by these generators were shipped last year alone to protect assets all around the world.

The system is environmentally friendly featuring Zero Global Warming Potential (GWP), no Ozone Depletion Potential (ODP), and is safe for occupied or unoccupied spaces. The systems are UL 2775 Listed featuring a generator that is rugged, sealed, and stainless steel to maximize the longevity of effectiveness.

Protect Your Truck & Yourself

Most Semi Truck fires begin in the engine compartment. Wear and vibration can compromise wires causing an electrical short which is the #1 cause of fire in Semi Trucks. This can happen when you are going down the road or if you are sleeping in the cab with the truck on. Sometimes a vehicle accident can start an engine fire. In any of these cases, FireGator™ can extinguish the fire and not cause any further damage to your property. Most importantly, it could save your life if you were sleeping or trapped inside the cab.
